

### **List of HR/Payroll Desktop changes effective September 30, 2002**

1. Changed Build Date to September 30, 2002
2. Summary of 2.3.2 changes:
  - a. JNOT – two new fields – number hired and % FTE hired added to track the filled positions associated with a particular job notice.
  - b. PAMT – total new window design which includes 4 new fields – future incumbents, future FTE, pending incumbents and pending FTE for future-dated and job notice encumbrancing purposes. Therefore, making the vacant counts equal to authorized minus the sum of the filled, pending and future counts.
  - c. PEDL – created to allow user to define values for a field associated with a specific personnel action/personnel action reason on PEDT.
  - d. PEDT – Modified to allow values to be defined on the PEDL for a field associated with personnel action/personnel action reason on PEDT when IN LIST is set to Y.
  - e. QPAT – modified to display total for pending and future incumbent and FTE counts: therefore, making the vacant counts equal to authorized minus the sum of the filled, pending and future counts.
  - f. QPTL – modified to display encumbered incumbents and FTEs instead of filled incumbents and FTEs. Also, changed so encumbered counts equal the sum of the filled, pending and future counts.
  - g. QPSR – modified to display the FTE percentage associated with each employee in a particular position.
3. There are several fixes to the system which will be discussed at the HR 2.3.2 training session on September 16<sup>th</sup>.
